

Nurture Class

At Butterwick we have a nurture classroom set up to meet the needs of specific learners who may find a larger classroom environment challenging or who may need specific support with their social, emotional or mental health needs.

This classroom has been an invaluable tool in improving the self-confidence, independence and resilience of some of our learners. This means we are able to better support the children's mental health which means when they return to class they are better equipped to learn.

I feel happier and calmer in nurture group then happier when I go back to class. I really enjoy going outside and I have made new friends

L Year 6

I love doing Yoga and drawing- O Year 4

I like nurture because it is quieter than the classroom because that is sometimes too busy for me - L Year 3
